How to create GitHub Account

1. Go to https://github.com/
2. Click "Sign up"
3. Use your personal or corporate e-mail
4. Choose your own password
5. Enter a username of your choice
6. Does not matter for the labs if you choose Y or N to receive product updates
7. Example:

```
Welcome to GitHub!
Let's begin the adventure

Enter your email
✓ student100@              .com

Create a password
✓ ●●●●●●●●●●●●●●●

Enter a username
✓ student100xperts

Would you like to receive product updates and announcements via
email?
Type "y" for yes or "n" for no

→ n                                              Continue
```
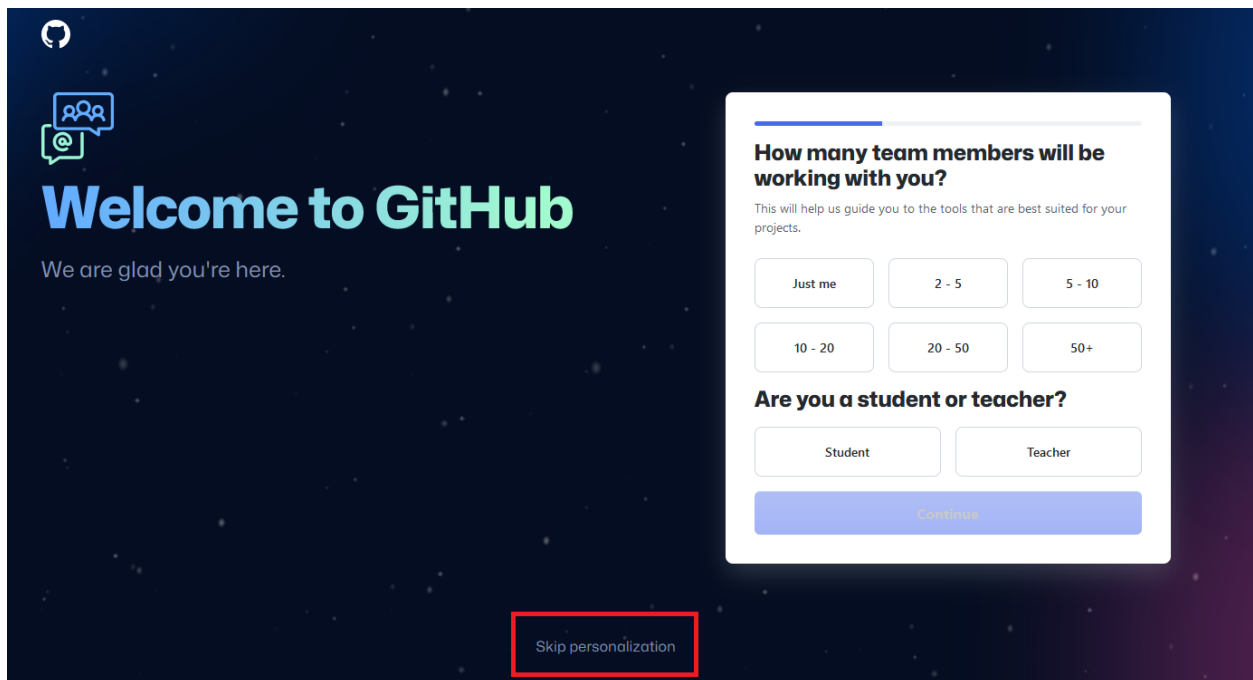

8. Answer the puzzle
9. Click "Create account"
10. A code will be sent to your email address. Copy it and paste in GitHub page or click in the link sent in the email
11. Click "Skip personalization"

12. Done! You should have a GitHub account now!
